

Overlayered Notes

1 Description

Overlayered Notes is a software built using the engine Unity. This software allows you to draw notes over everything on the screen.

2 Manual

This software has two main modes: Edit on, or Edit off.

- On: it allows you to draw every time you left click on the screen. To start a new line just left click out of the interface, then move the mouse while holding the click and it will draw following your mouse until you release the left click. There is no limit to how many lines you can draw.
- Off: when Edit mode is off, you can only interact with the software using the interface. Clicking out of the interface will not draw, it will be as if the program was closed and everything you are using in your computer will work as usual.

On off mode, the software enters a low CPU usage state to maximize performance.

2.1 User Interface

Once Overlayered Notes opens, you will see the simplified menu (Figure 1) at the right bottom corner of your screen like in Figure 7.

2.1.1 Simplified Menu

This menu consists on 1 colored dot which indicates whenever the Edit mode is on (green) or off (red), and 4 buttons: 3 arrows that open or close different sections of the simplified menu and 1 main button with a gear that opens or closes the full menu (Figure 5) in the middle of the screen.

1. Left arrow: Opens or closes the color palette menu (Figure 2), allowing you to change the color you want to use.

2. Corner arrow: Opens or closes the brush size menu (Figure 3). With this menu you can chose between 3 different brush sizes to use: small, medium and big. The size currently in use will be shown in this menu.
3. Top arrow: Opens the shortcuts menu (Figure 4). Since this menu is made of shortcuts, all its buttons are explained in the section 2.2.

All these menus can be opened or closed at the same time or in any combination.

2.2 Menu

From this menu (Figure 5) you can access to all the features of the software.

2.2.1 Red cross

This button closes the menu. has the same effect as clicking the gear button from the simplified menu.

2.2.2 Edit button

This button will turn on or off the Edit mode. When it says Edit On, it will turn the Edit mode on and when it says Edit Off, it will turn off the Edit mode. Its equivalent in the shortcuts section(Figure 4) on the simplified menu is the big ON/OFF button.

2.2.3 Undo

This button erases the last line drawn. Its equivalent in the shortcuts section (Figure 4) on the simplified menu is the top left button, pictured with a white arrow over a black background.

2.2.4 Undo Color

This button erases the last line drawn with the selected color. At its left has a little line showing which color is currently selected. Its equivalent in the shortcuts section (Figure 4) on the simplified menu is the top right button, pictured with a arrow colored with the currently selected color over a white background.

2.2.5 Clear All

This button erases all the lines drawn. Its equivalent in the shortcuts section (Figure 4) on the simplified menu is the bottom left button, pictured with a white eraser over a black background.

2.2.6 Clear Color

This button erases all lines drawn with the selected color. At its left has a little line showing which color is currently selected. Its equivalent in the shortcuts section (Figure 4) on the simplified menu is the bottom right button, pictured with an eraser colored with the currently selected color over a white background.

2.2.7 UI Size

This slide bar allows you to adjust the size of the simplified menu.

2.2.8 Show/Hide Palette

This button opens or closes the palette section of the simplified menu (Figure 2). Its equivalent in the simplified menu (Figure 1) is the arrow button at the left.

2.2.9 Show/Hide Shortcut Menu

This button opens or closes the shortcut section of the simplified menu (Figure 2). Its equivalent in the simplified menu (Figure 1) is the arrow button at the top.

2.2.10 Show/Hide Brush Size

This button opens or closes the brush size section of the simplified menu (Figure 2). Its equivalent in the simplified menu (Figure 1) is the arrow button at the top left corner.

2.2.11 Close Notes

This button closes the software. It is the only built-in way to close Overlayered Notes.
